NEOTROPICAL PRIMATE REMAINS IN CAVE DEPOSITS: AN ANNOTATED BIBLIOGRAPHY

Bernardo Urbani

The discovery of New World fossil primates has recently begun to be noticed by primatologists and speleologists, because of its interesting implications in both disciplines. The papers in this bibliography are only those printed in speleological publications, most still practically unknown among the primatological community. The listed entries considered are Primate species / Key words / Locality(ies) / Country(ies).

Gutierrez-Calvache, D., Jimenez-Vasquez, O. and Jaimez-Salgado, E. 1995. El registro fósil de platirrininos en las Antillas. Situación actual y perspectiva [The platyrrhine fossil record in the Antilles. Current status and

- perspectives]. *Actas del Congreso Internacional y Primera Reunión Iberoamericana por el LV Aniversario de la Soc. Cubana de Espeleología, La Habana*. p.63–64.
- General Antillean extinct primates / General review / Cueva de Berna, Central Cuban caves, Jamaican caves / Dominican Republic, Cuba, Jamaica.
